This is the threshold on which you are standing as a civilization at this point in time on your planet. In other words, you have crossed that threshold and come to the point where you can now perceive the resonances of the other civilizations of the galaxy. You are now able to induce the frequency of the other civilizations through the resonant properties of your own planet. This is the transformational life!

It is important to understand that you are not the only civilization on your planet. There are other civilizations that exist in your galaxy, and they are also experiencing similar transformations. It is through the resonance of these civilizations that you are able to access their knowledge and experience. This knowledge can be used to guide your own journey towards transformation. It is also important to understand that the appearance of these civilizations on your planet is not coincidental. They are here for a reason, and they are here to help you.

The idea is to establish relations, and that is what has been done. In communicating this way, and using the tool of telepathy, you could say "plugged into" my consciousness for each of the interactions we have with you through the process of telepathic communication. We have interacted with many other civilizations that are going through a similar process. We have been able to communicate with these civilizations and share our experiences with them. This has allowed us to learn from each other and become more advanced.

It is important to understand that these civilizations are not only advanced in terms of technological development, but also in terms of spiritual development. They have been using this process to guide their own transformation, and they are doing so in a way that is different from what you have been doing. This is because they have a different understanding of the nature of reality. They believe that reality is not just physical, but also spiritual. They believe that the physical world is just a manifestation of the spiritual world. They believe that the physical world is a projection of the spiritual world. They believe that the physical world is a reflection of the spiritual world.

It is important to understand that these civilizations are not only advanced in terms of technological development, but also in terms of spiritual development. They have been using this process to guide their own transformation, and they are doing so in a way that is different from what you have been doing. This is because they have a different understanding of the nature of reality. They believe that reality is not just physical, but also spiritual. They believe that the physical world is just a manifestation of the spiritual world. They believe that the physical world is a projection of the spiritual world. They believe that the physical world is a reflection of the spiritual world.

It is important to understand that these civilizations are not only advanced in terms of technological development, but also in terms of spiritual development. They have been using this process to guide their own transformation, and they are doing so in a way that is different from what you have been doing. This is because they have a different understanding of the nature of reality. They believe that reality is not just physical, but also spiritual.
