Mini Militia game play [Terminologies defined]:
It is a fantastic multiplayer game that will never bore you.
Doodle army man lost in the jungle with enemies all around loaded with weapons.
Gameplay is classic yet interesting.
For example, all of your cousins gathered at any place and you don't have even connectivity to the internet, still, you guys can play together and enjoy.
This is the main reason behind its amazing popularity.
When connected to internet (Online):
This game gives you three options to play.
The first option is quick to play and the second option is to Play Online.
These two option requires internet connectivity to play.
Quickplay is the game mod where you just have to choose map and game will be started with random players over the internet.
In this mode you will play with 6 random players from all over the world.
Most of mini militia modified variants work on this quick mode.
In-Play online mode, you also need internet connectivity.
This is further divided into 3 more sub-option to choose from.
Free for all: As the name suggest, you can play the game without making any teams.
Same like Quick play mode, just chose map and start playing with random players over the world.
Team Death Match: This is the best mode which add more excitement and fun in the game.

Same like previous, random people will be there for teaming an playing in random server.
This option is also available in all mini militia mod apk on this site.
Custom game: If you want to join any specific mini militia server instead of random one, this option is for you!
I personally like "New Player America server" and "Battle Zone America server".
Choice can be vary person to person based on many facts.
SO it's all depends on your priorities.
If you a real action game lover, check out GTA san andreas apk.
Play with friends over internet: If you want to play mini militia with your specific friends who lives in other cities but have internet connectivity, then this option is for you.
For this you have to add your friends in a server and then start playing.

This option is shown as "Practice (Local)".
Enjoy game over LAN wifi connection or via Bluetooth.
You can play mini militia with friends in following ways.
Add friends on mini militia (LAN Wifi):
To enjoy game with your fellows, friends or cousins, you need to connect all other mobile phones with hotspot of one phone known as host.
When all mobiles or players are connected to the same host, then they all can see the option to join game otherwise option will not be visible.
Host set the game name that will appear on other screens and maximum 12 players can join one host game connected to the same hotspot.
When you ready just press ready button and the game will star after 6 seconds.
Play via Bluetooth: Its connection theme is similar as in case of Wi-Fi, but here the connection medium is Bluetooth.
This mode is still under construction but once it released it will work in the way as explained.
Here 4 options are provided in "Practice Local" play that are explained below:
Death Match: In this mode you can play as individual or as group and try to kill each other to get maximum points.
One with higher points will be considered as winner.
